

Toyota Forklift Parts

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., also referred to as TMHU, have been the best selling lift truck dealer in the United States. This business has been based out of Irvine, California for well over 40 years, providing a complete line of quality lift trucks. With an impressive reputation of durability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the keystone of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are built here.

Every one of Toyota's manufacturing facilities within Canada and the U.S. comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its devotion to continuous improvement and its environmentally friendly systems. It is the first and only manufacturer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For instance, the Toyota 8-Series IC lift trucks emit 70% fewer smog forming emissions than the existing centralized EPA standards and have complied with California's strict emission standards and regulations.

Toyota Material Handling, U.S.A. - The Industry Leader

Brett Wood, President of TMHU, associates Toyota's accomplishment to its stout commitment to manufacture the finest quality lift trucks while delivering the utmost customer service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." • TMHU's parent company, Toyota Industries Corporation, also called TICO, is listed in Fortune Magazine as the world's largest lift truck provider and is amongst the magazines impressive World's Most Admired Companies.

New Meaning to Environmental Responsibility

Toyota Industries Corporation, as the parent company, has instilled a rich corporate doctrine of environmental stewardship in Toyota. Not a lot of other companies and no other lift truck producer can match Toyota's record of protecting the environment while concurrently advancing the economy. Environmental accountability is a key aspect of company decision making at Toyota and they are proud to be the first and only producer to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet another reason they remain a leader within the industry.

In 2006, Toyota launched the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission standards, and also meets California's more elaborate 2010 emission standards. The end invention is a lift vehicle that produces 70 percent fewer smog forming emissions than the current Federal standards tolerate.

What's more in 2006, Toyota developed a relationship with the Arbor Day Foundation, furthering their responsibility to the environment. Greater than 57,000 trees have been planted in regional parks and national forests damaged by natural causes such as fires, as a product of this relationship. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's system of sellers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Toyota's lift trucks offer improved stability, visibility, productivity, ergonomics, and all the leading safety technology that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS"•, helps reduce the chance of mishaps and accidental injuries, in addition to increasing productivity levels while minimizing the likelihood of merchandise and equipment damage.

System Active Stability is able to sense factors that could lead to lateral volatility and likely lateral overturn. When one of these factors have been detected, the SAS will instantly engage the Swing Lock Cylinder to re-stabilize the rear axle. This transitions the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also helps to prevent injuries or accidents while adding stability.

The SAS systems were originally used on the 7-Series internal combustion lift vehicles which were put on the market in 1999. These systems helped push Toyota into the lead for industry safety standards. Now, SAS is used on practically every modern internal combustion products and is standard equipment for the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with mandatory worker instruction, overturn fatalities across all designs have decreased by 13.6% since 1999. Also, there has been an overall 35.5% decrease in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's uncompromising principles reach far beyond the machinery itself. The company believes in providing general Operator Safety Training services to help users satisfy and exceed OSHA standard 1910.178. Training packages, video lessons and an assortment of resources, covering a wide scope of topics-from personal safety, to OSHA regulations, to surface and cargo conditions, are accessible through the seller network.

Toyota has maintained a continuous existence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, created its 350,000th lift vehicle. This reality is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are manufactured in the United States.

TMHU is situated in Columbus Indiana and houses nearly 1 million square feet of manufacturing facilities over 126 acres of

property. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service components, with the entire investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both sellers and buyers of TMHU. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live product demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its creator, Sakichi Toyoda, in 1867, and finally a education center.

The NCC embodies Toyota's dedication to providing top-notch consumer service. TMHU's 68 authorized Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations all through the U.S, present the most complete and inclusive consumer service and support in the industry. The company's new and Certified Used lift trucks, service, components, and financing capabilities make Toyota dealerships a one-stop shop to ensure overall consumer satisfaction.
