

## TCM Forklift Parts

TCM Forklift Parts - In the international industry of material handling, forklifts play an important part for transporting industrial goods. First innovated as industrial vehicles during the 1930s in America, forklifts gained popularity following WWII in the 1940s. Becoming an efficient and reliable means to material handling solutions, the practicality and need of these machines spread globally.

First founded as Toyo Carrier Manufacturing Company Limited, in 1949, the company was later renamed Toyo Umpanki Co. prior to becoming known as the TCM Corporation. Established by Mr. N. Niwa manufactured Japan's first lift truck. Through the years, TCM forklifts have become an international leader in lift truck manufacturing and have built a solid reputation with the trade. TCM started constructing forklift manufacturing locations outside of Japan during the 1980s and is presently engaged in forklift manufacturer at three foreign factories in the United States, Europe and China.

TCM proudly makes various models of industrial forklifts with over 50 years of accumulated technology and expertise, making their products used and recognized all around the world. Characterized by strong initiatives and energetic staff, TCM continues to look toward the future and intends to become a world-class leading business.
