

Barrel Clamps

Barrel Clamps - Known as "Barrel Clamp", this particular hydraulic attachment is utilized on lift trucks so as to clutch items which you need to transport utilizing the forklift. Usually, they're used to barrels, handle kegs, and paper rolls, together with some barrel clamp designs having the ability to revolve the cargo. For instance, the revolving function enables the individual operating the forklift to be able to slot in a vertically stored paper inside the horizontal intake of a printing press.
